

## [Canadian Journal of Plant Science](#)

Canadian Journal of Plant Science is an international peer-reviewed journal edited by the [Canadian Society of Agronomy](#), the [Canadian Society for Horticultural Science](#) and the [Canadian Weed Science Society](#).

This bimonthly publication reports peer-reviewed research in all aspects of plant science, including agronomy (grains, forages, industrial and alternative crops), horticulture (fruits, vegetables, ornamentals), and pest management (entomology, plant pathology, weed science).

Cross-disciplinary papers in the application of technology, plant breeding and genetics, physiology, biochemistry, microbiology, management, economics, and plant production systems are also published.

Many contributions reflect aspects of plant growth and reproduction, such as winter-hardiness and cold and drought tolerance, unique to cooler latitudes.

Reviews, letters to the editor, the abstracts of technical papers presented at the meetings of the sponsoring societies and conference proceedings may also be published, subject to the approval of the Editor. Contributions are published in English or French with abstracts in both languages. A page charge is payable on publication.
